

Naiade congratulates EU with her 50th anniversary

Berlin, Germany, April 2007 Being present as an exhibitor at the manifestation on behalf of the 50th anniversary of the EU in Berlin has not been without success. Amongst several hundreds of thousands of visitors many representatives of different NGO's and governments showed great interest in the Naiade water purification unit.

The EU has been of great importance for the Naiade since in 2004 the "International Cooperation Award" has been handed over by the EU in Brussels, Belgium, to the Nedap management. The report stated: "The jury was impressed with the Naiade system concluding that it has "massive potential in the battle against water-borne diseases, particularly in remote areas in the developing world" ".
